

Disco! Bunting

Fabric requirements:

- 1x stash pack of 10 different fabrics
- 1x long quarter of matching fabric

Instructions:

1. Press, square up and trim each fabric to exactly 10 inches square.
2. Make a mark 3 inches in from each corner on all 4 sides. Join the marks with lines as shown to create the triangles.

3. Cut out the triangles and place wrong sides together. Sew along the long edges approximately $\frac{3}{8}$ " from the edge.
4. Trim the long sides with pinking shears or a pinking rotary blade to prevent fraying.
5. Cut two 2" width of fabric strips from the long quarter and join at one end with a diagonal seam.

6. Fold in half lengthwise then press the edges to the middle (you can use a 1" bias tape maker to make this step easier).
7. Place the short edge of the triangles into the fold, the first 4" from the end and then at 2" intervals and pin/clip in place.
8. Turn the ends of the long strip under and sew along the length, securing the triangles in place.
9. Voila, one strip of bunting! This method will work for any of our stash packs, and you can just alter the length of bunting for different numbers of squares in the pack.
